**The iPad revolution in your car!**

**Padbay provides safe integration and quick access to your iPad mini on the dashboard**

**Erkelenz, March 2015** – This is more than just another device to dock an iPad to the dashboard!

For people waiting for the ultimate tool to access safely and comfortably apps and contents on their iPad Mini in the car - here is a unique integration solution: by simply inserting the iPad mini into the Padbay device, car owners can place their tablet in front of their car radio and conveniently use it on the road. The 1-DIN or 2-DIN car radio with Bluetooth-Audio A2DP remains.

The iPad mini can be connected with the car radio via Bluetooth. Without installing unnecessary cables and other installation complexities car owners can use their iPad mini to play music, receive and reply mails, display rear view cameras and even more.

Once the iPad mini is mounted, one can furthermore enhance the iPad mini's usability by downloading and using the Padbay App. The Padbay App offers a vast range of multimedia and communication functionalities paired with lots of other extra features.

Padbay is available for several car models and offers a broad selection of vehicle specific products for comprehensive functionality.

For more information about Padbay please visit [www.padbay.net](http://www.padbay.net)

Apple, iPad and iPad mini are trademarks of Apple Inc.  
Bluetooth is a registered trademark of Bluetooth SIG, Inc.
