

PLUG & PLAY SOUNDUPGRADE VW T6.1

NEW

UG VAG 14

Universal 145 mm woofer for various VW, Audi, Skoda, Seat (V.A.G.) models.

ETON is known for its Plug and Play SoundUpgrade range, for several years ETON has been the market leader in terms of full integration and custom-fit speakers. Now the range is extended by the VAG 14 Universal 145 mm (6") bass-midrange driver, this is the birth of a whole upgrade series for all current V.A.G. models.

Several current V.A.G. models (VW Golf 8, VW T6.1, VW Polo V and many more) are equipped with a 145 mm woofer. The newly developed midrange/bass driver impresses with its 2-layer fiberglass paper cone known from the POW series. This extremely stiff and damped cone is notorious for its high level performance as well as its warm and full-bodied sound character. Dynamic, massive punches are possible with this. The smaller cone area of just 145 mm is compensated for thanks to a strong ferrite magnet system and the newly developed long excursion surround, so the new VAG 14 is in no way inferior to a conventional 165 mm woofer. Crisp, dynamic and contoured bass response and tuned for the long haul. Thanks to the elaborate design and tuning, the VAG 14 can be integrated into various vehicles from large (VW Transporter T6.1) to small (VW Polo V).

The highly elastic voice coil with the permanently elastic centering allows low-distortion reproduction even at high levels! The newly developed plug and play speaker baskets made of fiberglass-reinforced plastic are extremely torsion-resistant and guarantee a 100% fit. The speakers have the VAG specific connector plugs and have an optionally usable low-pass cable crossover with in the set, which leads to optimal tuning in your vehicle as well. Suitable for various VAG models: VW T6.1, Polo V, Golf 6 rear, E-Golf, Golf 8, Tiguan II rear, TRoc, T-Cross, Caddy and many more. (please note current compatibility list: www.eton-caraudio.com)

ENGINEERED IN GERMANY

NEW

Tief-/Mitteltöner Bass- /midrange	145 mm (6")
Impedanz Impedance	3 Ω
Musikbelastbarkeit music power	80 W
Kennschalldruck Sound pressure level	88,5 dB

→ **UG VAG 14** – 145 mm (6") Plug and Play SoundUpgrade woofer / midrange set. Consisting of a 2-layer fiberglass paper cone, fiberglass-reinforced plastic basket, precision-fit connector plugs, sealing flange on the back of the basket. Extremely strong ferrite magnet with large core bore and new T-yoke design. Long-stroke surround with heavy-duty voice coil and permanently elastic centering for powerful bass. 80 W music power handling, 3 ohms impedance for high efficiency even at the series radio, 88.5 dB sound pressure level, including optional low-pass cable crossovers. Engineered in Germany.

UG VW 28 T6.1

New Plug & Play VW 28 mm tweeters for the VW T6.1

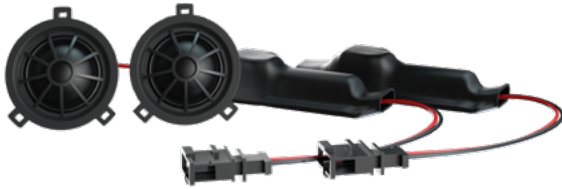

VW T6.1 drivers pay attention: Now there is finally the right sound upgrade for all VW T6.1 vans. A newly developed UG VW 28 T6.1 plug and play tweeter with cable crossover and custom-fit connectors included in the set. The new tweeter was developed specifically for the new VW T6.1 and fits with its special 3-point mounting in the original installation locations. The 28 mm fabric tweeter with strong neodymium magnet plays extremely fine resolution and silky. This smooth, fine-drawing tweeter is particularly suitable for long distances and harmonizes in combination with the UG VAG 14 woofer. A perfect bundle for the new VW T6.1. Made in Germany manufacturing and development.

ULTIMATE SOUNDUPGRADE

The ultimate Plug & Play SoundUpgrade for the **VW Transporter T6.1**

The ultimate upgrade in terms of sound and completely reversible, hidden and simple as never before - that's Plug & Play in 2022! An upgrade available in different levels allows the customized design of the sound system. The new UG VAG 14 universal 145 mm (6") woofer set in combination with the new UG VW28 T6.1 28 mm (1 1/8") fabric tweeter set provides the basic foundation. To improve the bass foundation and bass performance, an additional active subwoofer mounted in the passenger seat console can now be used in the downfire principle. The UG VW T-SUB KIT enables a uniform sound propagation in the entire vehicle as well as the simple installation of the subwoofer. A high-quality, German-made, solid metal holder for the active subwoofer. This bracket is screwed to the original seat console with the supplied metal clips and retaining screws, no additional holes are required for this. The extremely compact ETON MICRO 120.2 2-channel Class-D power amplifier can also be used for semi-active operation of the front speakers and brings a significant increase in efficiency and precision. For easy cabling of the ETON MICRO 120.2 and the USB 6 / USB 6 AR active subwoofer, the necessary power quadlock cable set is available - the ETON UG TCC (Transporter Connection Cable). This cable kit is already equipped with the exact connection plugs for the active subwoofer and the amplifier and is simply connected behind the original headunit. There is no need to run additional power cable to the individual components, also eliminates the need for additional fuse holders or similar! Plug and Play - 100% reversible (leasing vehicles) and completely integrated in the original installation locations!

USB 6

ENGINEERED IN GERMANY

Aktiv Untersitzbass <i>Active underseat subwoofer</i>	150 mm (6")
Verstärkerleistung <i>Amplifier power</i>	160 W (2 x 80 W)
Impedanz <i>Impedance</i>	2 x 2 Ω
Tiefpassfilter <i>Low pass filter</i>	50 – 100 Hz
Basspegelfernbedienung <i>Bass level remote control</i>	yes
Länge <i>Length</i>	289 mm
Breite <i>Width</i>	225 mm
Höhe <i>Height</i>	75 mm

→ **USB 6** – 150 mm (6") under-seat active subwoofer in a noble aluminum die-cast housing, flat dimensions for mounting inside the vehicle. The USB series impresses with its timeless design and technical data and features: High level inputs for factory radios without RCA outputs, bass level remote control, 160 W (2 x 80 W), low pass filter from 50 Hz - 100 Hz, 4.4 kg weight and smart dimensions of 289 x 225 x 75 mm.

ET-MICRO120.2

MICRO 120.2

ENGINEERED IN GERMANY

Kanäle <i>Channels</i>	2
Verstärkerleistung an 4 Ohm <i>Amplifier power at 4 ohms</i>	2 x 85 W
Verstärkerleistung an 2 Ohm <i>Amplifier power at 2 ohms</i>	2 x 120 W
Hochpegelgänge <i>High level in</i>	ja / yes
Tiefpass Filter <i>Low pass filter</i>	20 – 250 Hz
Hochpass Filter <i>High pass filter</i>	20 – 250 Hz
Auto sense on Funktion <i>Auto sense on function</i>	ja / yes
Maße (LxBxH) <i>Dimensions (LxWxH)</i>	110 x 80 x 42 mm

→ **MICRO 120.2** – the test winner in micro format. Small, practical, strong. The Micro 120.2 impresses in numbers, 110 x 80 x 42 mm! Minimal dimensions and yet maximum power! 2-channel Class-D amplifier technology with 2 x 85 W power into 4 ohms and 2 x 120 W into 2 ohms can be seen. The new problem solver in terms of space and power impresses with its many features: Hi- and Lowpass filter, adjustable active crossover (20 - 250 Hz), adjustable input sensitivity 0.45V - 6 V. Auto-Sense On, suitable for vehicles with start-stop function. Modular, adjustable mounting brackets. Innovative cooling fin design and modern connector plugs finish off the Micro power amplifier. Here comes together what must come together, performance meets the best possible mounting and smart dimensions - the MICRO 120.2.
